PicoTime™

Pico Second Resolution Test Set

- Clock characterization such as quartz crystal oscillator, Rubidium atomic clocks and cesium clocks
- Calibration of quartz crystal oscillator, and atomic clocks
- Easy to use
- DUT Frequency Range: 1MHz to 30 MHz
- Phase time resolution and noise: <2ps rms
- Automatic operation
- No calibration required

The Pendulum PicoTime™ is a low-cost, high-performance measurement test set. It features a cutting-edge 1ps resolution and an easy-to-use software application for performance analysis.

System Description
The system is designed to make a direct frequency measurement in comparison with an external 10 MHz frequency reference. Picotime is based on a heterodyne system using direct digital synthesizer (DDS) technology to allow measurements in the range of up to 30 MHz. The external 10 MHz reference divided by 2x10^7 is used to make time interval measurement each second.

Direct frequency measurement is used for programming DDS. The DDS divides the device frequency around 1kHz by using two mixers. As indicated in the block-diagram, the whole system is based on a heterodyne architecture with a double frequency conversion.

Three outputs are available:
- 1kHz where a crystal filter based PLL is used to restrict the bandwidth to only 1Hz
- 1kHz with about several 100 kHz bandwidth
- 1pps reference

The system is controlled with the PC COM interface. When connecting an external counter, other types of measurements can be performed.

General Specifications

Dimensions and Weight

- **Width x Height x Depth:** 445 x 300 x 44 mm (17.5 x 11.8 x 1.7 in)
- **Weight:** Net 3.5 kg (7.7 lb)

Software Upgrades

The latest software upgrades can be downloaded – free of charge from www.spectracomcorp.com

Ordering Information

**Basic Model**

**PicoTime:** Picosecond resolution test set

- **Included with shipment:**
  - 3-year product warranty
  - Power cable¹
  - Users manual on CD
  - RS232 communication cable to PC
  - Picotime installation SW on CD

₁EUR power cable is standard, alternative power cables are: USA (ordering code: US), China (ordering code: CN), Switzerland (ordering code: CH).

Options and accessories

**Option ST32:** Stable32 postprocessing and analysis SW

**Option E:** 19” rack mountable ears

**Option ExtW-5:** Extended warranty to 5 years
